How do I take Colobreathe®?

Colobreathe® is an inhaled medicine that contains a dry powder form of the antibiotic colistimethate sodium for use in the Turbospin® inhaler. An instructional video has been created to guide you on the correct technique of Colobreathe® administration. Please also refer to the patient guide and package leaflet enclosed with your medicine.

The instructional video can be accessed by scanning the QR code on the back of this card or by visiting:
